Homework 0 due Friday 1/17, by 11:59 pm.

Compose a short email to me (elizabeth.white@colorado.edu), from your CU email. This is just collecting background information (don't feel bad if you are just starting out) to help me calibrate the class in the next couple of weeks.

1.   Which programming languages have you used before now? How comfortable were you using them?

2.   Tell me a little bit about the most difficult program you have written. Did you get it to work, or to mostly work?

3.   What's the main skill you'd like to be able to gain from the class?

4.   Do you have a computer at home that you can use for this class?

5.   Do you prefer to do your work in advance, or at the last minute? (Or do you plan to do it in advance, and then end up doing it at the last minute anyway?)

6.   When during the week (outside of your recitation) are you free to come get help in the lab? When can you not make it?

7.   What other concerns do you have?   For instance, are you worried that you'll be racing to keep up in here, or that you'll be bored? Is there anything I should know about you in order to treat you fairly in the class?
